Pearls of Wisdom

I hope everyone is having a great summer so far. It is hard to believe that more than half of the year is gone. I know many of you had other obligations and were not able to attend our workshop in June. Kathy Ridley-Merriweather from Komen Tissue Bank gave an awesome presentation; once again Clara did a great job. I'm sure she would have loved hearing her. We learned what the Komen Tissue Banks does, the process and storage of tissues collected, what the procedure is for collecting tissue. We learned that even though more white women have breast cancer, more African American or (black) women die from breast cancer. Diversity is very important at the Tissue Bank; this is how they study the many different things each day. They are also looking for people to volunteer, if interested go to their website and find the information on volunteering.

We will be getting ready for our AAMA Annual Conference September 18-21 in Portland, Oregon. If you haven't attended a National conference this is truly an experience you will not forget. We would like to see as many as possible representing the state of Indiana.

Please remember to pass the word on our next workshop and cook out which is August 8, 2015, so mark your calendar now. Also a BIG thanks to Santa Bruce for all that you do, we appreciate you more than you will ever know.

Remember if you have recipes for the recipe book please get them to Sandy Johnson. We hope to start this very soon. Hope to see you in August.

Joyce Edds, CMA (AAMA) CPT (ASPT)

A Thank You to ISMA,

Give a man a fish and he will eat it. Give a man a gift card to Bass Pro and he will buy equipment to catch his own fish and want to fish all the time. Bad move, ladies! Just kidding – you can't get rid of me that easily.

I really am touched by your token of appreciation. I enjoy making the different items and get lots of pleasure hearing the stories of how much you all enjoy them. My birds have already hatched a family in the ISMA barn house. Great idea, St. Joseph District!

Once again, thanks so very much, ISMA!

Now, GONE FISHING!

INDIANA STATE MEDICAL ASSOCIATION REPORTS

The failure of two major bills during legislature session, Bills SB.55 and HB.1043 would have greatly impacted medical malpractice premiums and threatened access and quality of care for thousands of Hoosiers. This illustrates the importance of physician involvement.

The ISMA knows about the costs of medication and is advising Indiana residents about the Indiana Drug Card Program. This program is HIPPA compliant and requires disclosure of No personal information and works for anyone without prescription coverage, as well as anyone who has a high deductible plan, high co-pays or a health savings account (HSA), as a way to reduce the costs of medications.

Report card shows Indiana could do more to curb tobacco use; Tobacco prevention/control program funding, Tobacco Taxes and Access to cessation services all reported a Grade F. Smoke free air reported a Grade C. Help patients stop smoking by encouraging them to use the free Indiana Tobacco Quitline by calling 1-800-QUIT-NOW (800-784-8669). Smokers can talk to experienced professional coaches trained in cognitive behavioral therapy. E-cigarettes are becoming increasingly popular as an alternative to tobacco. Read in-depth information at www.ismanet.org/go/IDLN22315

Valuable information from the ISMA Reports publications-Tammy Daily, CMA (AAMA)

Survey: The Indiana Society of Medical Assistants would like to have each of you answer our one question survey.

Would you be willing to have an e-copy of the Med-A-Scoop rather than a paper copy? We are trying to “go green” and ask our members if that would be an option! Let me know by emailing me your response to msneu@yahoo.com. Put Survey in the subject line. If you are willing **and** have a different email address than the one on record with the AAMA, be sure to let me know!

Eating Outdoors, Handling Food Safely

Pack and Transport Food Safely

Keep your food safe: from the refrigerator/freezer . . . all the way to the picnic table.

- **Keep cold food cold.** Place cold food in a cooler with ice or frozen gel packs. Cold food should be stored at **40°F or below** to prevent bacterial growth. Meat, poultry, and seafood may be packed while still frozen so that they stay colder longer.
- **Organize cooler contents.** Consider packing beverages in one cooler and perishable foods in another. That way, as picnickers open and reopen the *beverage* cooler to replenish their drinks, the *perishable foods* won't be exposed to warm outdoor air temperatures.
- **Keep coolers closed.** Once at the picnic site, limit the number of times the cooler is opened as much as you can. This helps to keep the contents cold longer.
- **Don't cross-contaminate.** Be sure to keep raw meat, poultry, and seafood securely wrapped. This keeps their juices from contaminating prepared/cooked foods or foods that will be eaten raw, such as fruits and vegetables.
- **Clean your produce.** Rinse **fresh fruits and vegetables** under running tap water before packing them in the cooler - including those with skins and rinds that are not eaten. Rub **firm-skinned fruits and vegetables** under running tap water or scrub with a clean vegetable brush while rinsing with running tap water. Dry fruits and vegetables with a clean cloth towel or paper towel.— Packaged fruits and vegetables that are labeled "ready-to-eat," "washed," or "triple washed" need not be washed.

Follow Safe Grilling Tips

Grilling and picnicking often go hand-in-hand. And just as with cooking indoors, there are important guidelines that should be followed to ensure that your **grilled food** reaches the table **safely**.

- **Marinate safely.** Marinate foods in the refrigerator - *never* on the kitchen counter or outdoors. In addition, if you plan to use some of the marinade as a sauce on the cooked food, *reserve a portion separately* before adding the raw meat, poultry, or seafood. **Don't reuse marinade.**
- **Cook immediately after "partial cooking."** If you partially cook food to reduce grilling time, do so *immediately before* the food goes on the hot grill.
- **Cook food thoroughly.** When it's time to cook the food, have your food thermometer ready. Always use it to be sure your food is cooked thoroughly.
- **Keep "ready" food hot.** Grilled food can be kept hot until served by moving it to the side of the grill rack, just away from the coals. This keeps it hot but prevents overcooking.
- **Don't reuse platters or utensils.** Using the same platter or utensils that previously held raw meat, poultry, or seafood allows bacteria from the raw food's juices to spread to the cooked food. Instead, have a clean platter and utensils ready at grill-side to serve your food. Fda.gov
